A REWARDING POSITION IN CANADA'S SOUTHERNMOST CITY

Windsor Regional Cancer Centre seeks applications for a Medical Oncologist to deliver a broad spectrum of adult oncology care within a dynamic multi-disciplinary team on a level with other top quality medical oncology programs. Windsor Regional Cancer Centre has a strong relationship with both the University of Western Ontario (UWO) and the University of Windsor.

You will enjoy living in an international community that combines all the conveniences of a mid-sized city (short commutes and family-friendly neighborhoods, etc.) with the perks of living in a major cosmopolitan centre – world-class arts and culture and professional sports, not to mention an international medical fraternity engaged in leading-edge health care.

We're looking for an energetic and dynamic professional with a background and training in the field of medical oncology, hematology experience and solid-tumor oncology expertise who can function efficiently within a multi-disciplinary setting. Interest in, and knowledge of, the design and conduct of clinical trials is desired.

MINIMUM QUALIFICATIONS: MD degree and license (or eligible) to practice in Ontario; Certification by Royal College of Physicians & Surgeons of Canada in Medical Oncology

Consideration will be given where equivalence of medical training qualifications (Foreign trained applicants) is consistent with criteria through the College of Physicians & Surgeons of Ontario and would allow for clinical practice within their specialty.

INQUIRIES/INFORMATION:

Kenneth Schneider, B.Sc. MD., F.R.C.P.C.
Chief, Department of Oncology
Windsor Regional Cancer Centre
Windsor Regional Hospital
