William Osler Health Services (Osler) is one of Ontario's largest community-based organizations, delivering innovative health care with compassion through more than 820,000 patient interactions every year. With Osler's three sites: Brampton Civic Hospital, the recently renovated Etobicoke General Hospital, and new Peel Memorial Hospital for Integrated Health and Wellness, we offer a wide range of health services.

We are recruiting a hematologist for combined malignant/benign hematology practice to join our dynamic team of hematologists and oncologists, nursing and allied health.

Osler offers a variety of unique opportunities for hematologists with a pharmacist supported outpatient thrombosis clinic, and outpatient benign hematology hospital space with nursing support. Osler oncology program has the first in Canada rapid in house next generation sequencing. If interested, Osler has a robust research program and opportunities for medical education with many of our hematology/oncology physicians having University appointments. The Osler hematology program includes hematopathologists and thrombosis pharmacists. We also have a dedicated paediatric/adult hemoglobinopathies program.

Osler covers hematology at both Etobicoke General Hospital and Brampton Civic hospital and the successful candidates would provide consultative services.

The successful applicant must be able to be licensed to practice in Ontario, hold a fellowship in internal medicine from the Royal College of physicians and Surgeons of Canada with a subspecialty in Hematology (existing or within 1 year of acceptance). Leadership and/or Quality improvement experience are considered an asset and encourage applicants with innovative program ideas or quality improvement initiatives to apply.
